EDUCATION

University of Michigan, Ann Arbor, MI

August 2023 to May 2027

College of Engineering Computer Science Major: GPA: 3.37

WORK EXPERIENCE

Lear Corporation, Southfield, MI

May 2026 to August 2026

Information Technology Application Development Intern

- Utilized Palantir Foundry to develop complex dashboards for project management platform user and usage information by building pipelines, managing ontologies, incorporating AI agents and creating workshop applications
- Created presentations and help videos to train users on new Palantir Foundry applications for completing user access reviews
- Collaborated on a team project to develop a talent-retention strategy for Lear, proposing recurring Foundry workshops, help sessions, tutorials, and demonstrations to increase employee adoption and engagement with emerging technology

University of Michigan Robotics, Ann Arbor, MI

January 2024 to Present

Instructional Aide: ROB 101

- Assists students through troubleshooting programming projects and explaining linear algebra concepts with coursework through weekly office hours and class time
- Grades and provides feedback on linear algebra and Julia programming work

A.S.K. Services, Plymouth, MI

Title Searcher, Wayne County Project Intern

May 2024 to August 2024, May 2025 to August 2025

- Completed title searches for Wayne County with a goal of preventing foreclosures in Metro Detroit
- Conducted 50+ consecutive title searches in a row without errors, eliminating the need for a checker and increasing efficiency
- Promoted to audit and verify other interns' title searches to ensure correctness before submission to the county.

Dry Goods USA, Ann Arbor, MI

March 2023 to October 2023

Key Holder

- Demonstrated great customer service skills through assisting shoppers resolving in-store issues independently
- Closed and opened the store alone and with other associates while maintaining security and operational standards
- Trained new keyholders and associates, reducing onboarding time and improving team performance.

SKILLS

- Tools: Palantir Foundry, Visual Studio Code, GitHub
- Programming: *Proficient*: C++, Julia, *Intermediate*: MATLAB, Java, Python, C, R, HTML, CSS, JavaScript
- Software: Microsoft Word, PowerPoint, Excel

RELEVANT COMPLETED COURSES

Relevant Coursework: Software Engineering, Human-Centered Software Design, Web Design, Development & Accessibility, Data Structures & Algorithms, Computer Vision

PROJECTS

- Capstone (Current)
- Facial Recognition Algorithm
- Digital Forensic Investigation
- Cookbook Website: JavaScript, CSS, HTML
Designed and developed a fully accessible, responsive recipe website from scratch using core web technologies
Created hand-drawn visual assets and integrated personally tested recipes to enhance engagement and personality
